EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In claim 7, line 2 the term "24₀" has been deleted.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The prior art of record does not disclose; in a method and apparatus for forming a material having an exponential stress-strain behavior into a thin-walled hollow shell by using a driven rotating clamping device for clamping a periphery of a workpiece, a rotatable spinning die which exerts a force against the workpiece and a path-controlled spinning roller; wherein a first control device controls the roller in a path-controlled manner and a second control device ensures that a relative velocity between the workpiece and the roller and a force exerted on the workpiece by the roller and the die are matched to one another so that the tension forces applied to the workpiece are less than a yield strength of the material.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
